Team Report: Team 13

Introduction

For Iteration 2, we further developed on Iteration 1 by adding stories that were 'nice to have' from the client, as well as adding essential stories that were not developed in Iteration 1. This has left us with a well rounded system with a good amount of features built around a strong core of functionality.

Starting the system

- To begin the system, navigate to the 'app' folder, using the relevant 'cd' commands.
- Then, run the main.rb file with 'ruby main.rb'
- README file is in project/docs
- Now the website should be running on your local box.
- Admin and user accounts:
 - o <u>admin@gmail.com</u>, pword : admin
 - o <u>user@gmail.com</u>, pword: user
 - o role1@gmail.com, pword: role1
 - o role2@gmail.com, pword: role2
 - o role3@gmail.com, pword: role3
 - o role4@qmail.com, pword: role4
- When creating a new account, there is a bug which will require the server to be restarted to access the account.

User Stories

Guest Stories

All employees and admins want these stories as well.

//Unchanged story - delivered in iteration 1

As a guest, I want to view all the public bookmarks.

- Acceptance criteria
 - Be able to view every public bookmark by using company computers.
- Client priority: 1
- Estimated effort: 8

//Story modified to only include search by title, as searching by the other fields was not as feasible

As a guest I want to be able to search for public bookmarks.

Note: search by title, assigned tags, date of creation, user that created the bookmark.

- Acceptance criteria:
 - When I enter an existing phrase in the search box I want to see assigned bookmarks.
 - When I enter an incorrect phrase in the search box I want to see 'No bookmarks found' error.
- Client priority: 4
- Estimated effort: 8

//Unchanged story - delivered in iteration 1

As a guest I want to be able to sign in.

- Acceptance criteria
 - o Be able to sign in account through sign in page
- Client priority: 1
- Estimated effort: 5

//Story not added

As a guest would like to report inappropriate bookmarks and add a reason for the report.

- Acceptance criteria
 - Be able to report by clicking the report button
- Client priority: 6
- Estimated effort: 3

Employee Stories

//Story unchanged - delivered in Iteration 1

As an employee I want to log in to my account.

- Acceptance criteria
 - Be able to log in account through login page
- Client priority: 1
- Estimated effort: 5

//Story unchanged - delivered in Iteration 1

As an employee I want to be able to log out of my account.

- Acceptance criteria
 - When I press 'log out' button I want to switch to guest account.
 - When I close the tab I want to log out of my account.
- Client priority: 1
- Estimated effort: 1

//Story unchanged - delivered in Iteration 2

As an employee, I would like to 'favorite' bookmarks

- Acceptance criteria
 - Be able to add bookmarks to my favorites and view them in a separate page
- Client priority: 7
- Estimated effort: 2

//We decided that the date of the bookmark should be the current date, so we did not include this as an editable field. Delivered fully in Iteration 2.

As an employee I would like to add bookmarks with information such as; Title, URL, Tags (e.g. Department, etc.), Date, Description, and whether it is public or not.

- Acceptance Criteria:
 - When I click a button to add a bookmark, I should be given a form with the ability to fill in all the required fields.
 - Each field should be checked that they have been filled in properly, if they have not, an error will be thrown.
- Client Priority: 1
- Estimated Effort: 3

//Story unchanged - delivered in Iteration 2

As an employee, I want to remove my bookmarks.

- Acceptance criteria
 - Be able to delete the bookmark that I previously created

- Client priority: 7
- Estimated effort:2

//Implemented in Iteration 2, unchanged

As an employee I want to be able to search for private bookmarks.

Note: search by title, assigned tags, date of creation, user that created the bookmark.

- Acceptance criteria:
 - When I enter an existing phrase in the search box I want to see assigned bookmarks.
 - When I enter an incorrect phrase in the search box I want to see 'No bookmarks found' error.
- Client priority: 4
- Estimated effort: 8

//Implemented in Iteration 2, unchanged

As an employee I would like to view private bookmarks.

- Acceptance Criteria:
 - When I open the application, I should be able to view all bookmarks (public and private).
- Client Priority: 1
- Estimated Effort: 8

//Ratings system - not delivered

As an employee I want to mark bookmarks as good or bad.

- Acceptance Criteria:
 - o I should be able to see 2 buttons to rate the bookmark either good or bad.
 - This should then feed into the overall 'rating' of the bookmark.
- Client Priority: 5
- Estimated Effort: 5

//Employee cannot create a new bookmark with URL already in database, but no comment redirection involved, an error page was used instead

As an employee I want to see a popup window when a bookmark already exists and be directed to comment on it.

- Acceptance Criteria:
 - When I set a bookmark with a URL that is already in the database, I should be alerted that it already exists.
 - I should be given the details of the bookmark that already exists and be directed to it.
- Client Priority: 5

Estimated Effort: 3

//Implemented in Iteration 2

As an employee I want to remove tags that I have added.

- Acceptance Criteria:
 - If I put a tag on a bookmark, I should be able to remove the tag that I have put on
 - I shouldn't be able to remove anyone else's tags.
- Client Priority: 3
- Estimated Effort: 3

//Favourites are viewed in the user profile - Delivered in Iteration 2

As an employee I would like to view my favourites.

- Acceptance Criteria:
 - Upon clicking the user profile button to see them, all of my favourited bookmarks should be shown.
- Client Priority: 7Estimated Effort: 2

//Implemented in Iteration 2

As an employee, I want to add a tag to any bookmark regardless of whether I created it.

- Acceptance criteria
 - o By clicking a button, I will be able to add tags to another bookmark.
- Client priority: 3
- Estimated effort: 2

//Not implemented

As an employee, I want to add comments to a bookmark that already exists.

- Acceptance criteria
 - By clicking a button, it will be able to add comments to that bookmark.
- Client priority: 7
- Estimated effort: 8

//Viewable on user profile

As an employee, I would like to see that I am suspended when I log in to my account.

- Acceptance criteria
 - o I will see a screen that tells me I am suspended
- Client priority: 2
- Estimated effort : 2

Admin Stories

//Edited to be displayed in a view - easier to implement - delivered in Iteration 2
As an admin, I want to be able to view all reported bookmarks as a notification in a view.

- Acceptance criteria:
 - When I receive the notification with the reported bookmark, I want to be able to follow the link to it
- Client priority: 6Estimated effort: 3

//Not implemented

As an admin I would like to delete a reported bookmark notification after I see it.

- Acceptance criteria:
 - o I don't want to have notifications with reports that have been resolved
 - Just by clicking a button, the notification should disappear
- Client priority: 6
- Estimated effort: 1

//Story unchanged - implemented in Iteration 2

As an admin I want to be able to remove bookmarks.

- Acceptance criteria:
 - If a bookmark is inappropriate, I would like to be able to remove it by clicking a button
- Client priority: 6
- Estimated effort: 2

//Story not implemented - deemed lowest priority

As an admin I want to remove employees.

- Acceptance criteria:
 - By clicking the "Remove" button, an employee's account should be deleted
- Client priority: 8
- Estimated effort: 2

//Story implemented in Iteration 2 - done with checkbox on update user

As an admin I want to be able to assign admin privileges to employees.

- Acceptance criteria:
 - When I press a button responsible for assigning admin rights on the employee profile I want that user to become an admin.
- Client priority: 2
- Estimated effort: 2

//Done with checkbox as in story above

As an admin I want to remove admin privileges.

- Acceptance criteria:
 - By clicking the "Remove admin" button, checking a checkbox, I want to be able to remove an admin's privileges
- Client priority: 8Estimated effort: 1

//Not implemented - deemed lowest priority

As an admin I would like to search for employees.

- Acceptance criteria:
 - In the search bar, an admin should be able to search for employees
- Client priority: 8Estimated effort: 3

//Not implemented

As an admin I want to be able to verify and approve an account that a user is trying to create.

- Acceptance criteria:
 - o If a user is trying to sign up their request is sent to my account.
 - When I accept the user request their account is created.
 - When I decline the user request their account is not created.
- Client priority: 1Estimated effort: 3

// Unchanged except from record of suspension - not feasible so was left out

As an admin I want to be able to view profiles of all employees.

Note: profiles should contain employee's name and surname, name of their department, date of joining the company, their employee status (suspended, etc.) and indication of whether or not they were ever suspended.

- Acceptance criteria :
 - When I click on the customer name, their profile should be displayed.
- Client priority: 2
- Estimated effort: 3

//Story unchanged bar checkbox instead of button

As an admin I want to be able to suspend and unsuspend employees.

- Acceptance criteria:
 - When I press 'suspend' buttoncheckbox I want employee to temporarily lose access to their account.
 - When I press 'unsuspend' button checkbox I want employee to regain access to their account.
- Client priority: 2
- Estimated effort: 3

Tackling Stories

We established roles as follows:

- 7 Group Members Total
- Responsibilities:
 - Scrum Master Lucian, Alicja
 - o Database Lead Cameron, Sergiu
 - Test Lead Julia, Lucian
 - o Presentation layer (interface to back end) Li, Julia done
 - o Front end (html etc.) Sergiu, Li
 - Client Contact Alicja, Yihang
 - o Version control Yihang, Cameron
- Roles:
 - o Tester Julia
 - Ruby developer Lucian Cameron
 - o Database admin Cameron
 - o HTML and CSS developer Sergiu Yihang
 - View developer Li
 - Sinatra expert Alicja

Our strategy for tackling stories was to rank them by the priority assigned by the clients. In the first term we got the clients to arrange the story cards with highest and lowest priority. We used these rankings to determine which stories to do first, and ended up completing the main parts of the system in Iteration 1.

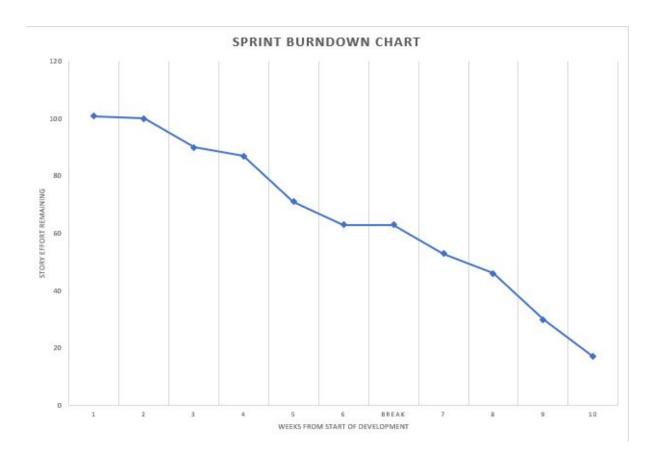

Team Member	Iteration 1 Tasks
Lucian	Verification of accounts
Alicija	Login, Logout, Signup (password etc) //Pair with Li
Julia	Manual tests
Cameron	Adding bookmarks
Sergiu	Database Creation, HTML Creation, Viewing bookmarks
Li	Login, Logout, Signup (password etc) //Pair with Alicija
Yihang	User view, Bookmark details

This involved the database with user and bookmark tables, the implementation of a bookmark view, creation of user accounts, creation of bookmarks, and curating the overall look of the website with HTML and CSS additions.

In Iteration 2 we expanded the system with features that were 'swant to have' as defined by the clients. This included a tags system, system for viewing users, admin system, comments system, along with other quality of life additions.

Team Member	Iteration 2 Tasks/Features
Lucian	Create admin page, View users, Edit users
Alicija	Update bookmark
Julia	Manual tests
Cameron	Deleting bookmarks, Comments
Sergiu	Improvement on views
Li	Tags, Favourites
Yihang	User profile

Burndown Chart

Our story management began slowly, with the first week not yielding large story production - however, after this we became more used to the sprints, and got a good amount of work done each week. The easter break in the middle paused our progress, but we continued to break down the stories in Iteration 2.

The overall trend shows that we may have been slightly too late in completing all the stories, but most of the stories we did not get completed were not high priority as ranked by the clients. Unfortunately this means that we still have some stories on the sprint backlog, and we did not end up implementing all of the 'nice to have' features.

Testing

We decided to use manual testing to a great extent as it allows us to clearly see the result of client interactions, not just how the software sees it. Everything has been documented in the photos below. Testing manually after every meaningful addition to the code allowed us to make sure that the behaviour is working the way we wanted it to in practise. The table contains the first and final test of each feature, the information concerning if the feature used to work or not was meant to help with the creation process.

Test Scenario n	num Te	st Case	Pre Conditions	Expected results			Actual Results	Pass/Fail	Final results
